LAVEENDRA KUMAR YARRAMSETTY

Full Stack Developer | ReactJS & Node.js | MERN Stack | AI-Enabled Web Applications

+91-9912493116 | laveenaee@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building enterprise-grade web applications using ReactJS (Hooks, Context API, Suspense) on the frontend and Node.js/Express.js on the backend. Skilled in designing and consuming RESTful APIs, implementing authentication and secure data handling, and managing application state with Redux/Redux Toolkit. Proficient in TypeScript, Next.js, MySQL, PostgreSQL, and Jest-based unit/integration testing. Experienced in Agile/Scrum delivery, Git version control, GitLab CI/CD, and AWS deployments, with growing exposure to AI-assisted features such as workflow automation and intelligent recommendations. Adept at translating Figma designs into pixel-perfect, accessible UI and collaborating with cross-functional teams to deliver polished, performant releases.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Context API, Suspense), JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Next.js, Redux/Redux Toolkit, Tailwind CSS, Bootstrap, Material UI (MUI), Fabric UI

Backend / Fullstack (MERN): Node.js, Express.js, RESTful API design & integration, Authentication/Authorization, MySQL, PostgreSQL, MongoDB (working knowledge)

Testing & Build Tools: Jest, Unit/Integration Testing, Webpack, Postman, Thunder Client, Debugging

AI-Enabled Development: Exposure to AI/ML-assisted features (recommendations, summarization, workflow automation), Generative AI tools for development productivity

Design & Methodology: Figma, Atomic Design, Responsive Design, Cross-Browser Compatibility, Agile/Scrum

DevOps & Version Control: Git, GitHub, GitLab CI/CD, AWS Deployments, Linux, MobaXterm

Tools & Process: JIRA, Sprint-Based Delivery, Code Reviews, Performance Profiling & Tuning

WORK EXPERIENCE

System Engineer — Fullstack (React.js & Node.js) Application Developer *Sep 2022 – Present*

Tata Consultancy Services (TCS), India

- Designed, developed, and maintained responsive React.js user interfaces and supporting backend services for enterprise-grade telecom and B2B web applications, ensuring 99.9% uptime for international clients.
- Built scalable end-to-end features using React.js (Hooks, Context API, Suspense), TypeScript, JavaScript (ES6+), HTML5, and CSS3 on the frontend with Node.js/Express.js services on the backend — reducing initial load times by 20%.
- Developed RESTful APIs and backend modules with clear contracts, input validation, and structured error handling, integrating them with frontend workflows via Axios and AJAX for reliable data flow.
- Implemented authentication/authorization flows and secure data handling practices across full stack applications.
- Developed and maintained reusable UI component libraries following Atomic Design principles, increasing development efficiency by 30% across multiple product lines.
- Implemented complex application state management using Redux and Redux Toolkit across large-scale Single Page Applications (SPAs).
- Wrote unit and integration tests with Jest and participated in code reviews to maintain high engineering standards; optimized frontend rendering and backend response times through profiling and performance tuning.
- Translated Figma UX designs into pixel-perfect, accessible, responsive UI components, contributing to design-to-development workflow improvements.
- Contributed to AI-assisted feature exploration (workflow automation and recommendation-style enhancements) while ensuring usability and measurable outcomes.
- Participated in project estimation, solution delivery planning, technical risk assessments, code reviews, and unit test plan reviews in Agile/Scrum sprints; performed as an emerging SME in React, documenting component guidelines and workflows.
- Contributed to GitLab CI/CD pipelines supporting automated builds and AWS cloud deployments for continuous delivery; reduced sprint delivery timelines by 25% through modular architecture, reusable components, and effective collaboration with backend, QA, and DevOps teams via JIRA and Git.

PROJECT EXPERIENCE

Telecom B2B Customer Portal — Malaysia (Onsite Client Engagement)

React.js | TypeScript | Node.js | Tailwind CSS | Redux | REST APIs | GitLab CI/CD | AWS

- Designed and built a high-traffic, multiplatform fullstack customer portal for a Malaysia-based telecom client supporting international roaming services, with React frontend and Node.js-based API integration.

- Developed modular React screens for order creation, tracking, and service management using Hooks and Context API, backed by REST APIs — reducing manual customer support dependency by 25%.
- Implemented Role-Based Access Control (RBAC) and workflow-driven UI screens, improving enterprise self-service capabilities and user experience.
- Integrated RESTful APIs with fully responsive, cross-browser-compatible design for international users across multiple platforms and devices.

CFL Project — London Client (React Migration & UI Modernization)
React.js | TypeScript | Next.js | JavaScript | Figma | REST APIs | Jest | Git

- Led frontend migration to a modern React architecture, decreasing UI-related production defects by 30% through scalable, modular component design.
- Built modular, reusable React components and transformed Figma wireframes into fully responsive, pixel-perfect UI components with high fidelity.
- Contributed solutions during team discussions with global stakeholders to deliver features within tight sprint timelines.
- Documented application processes and component workflows, enabling faster onboarding and significantly reducing knowledge transfer gaps.

CERTIFICATIONS

- **Claude Certified Developer - Foundations** — Anthropic / Claude, 2026
- **GitHub Foundations** — Microsoft / GitHub, 2026
- **Namaste React** — NamasteDev.com, 2025
- **Namaste JavaScript** — NamasteDev.com, 2024

EDUCATION

B.Tech — Electrical & Electronics Engineering
Aditya Engineering College, Surampalem | Jun 2016 – May 2019

Diploma — Electrical & Electronics Engineering
Prasiddha College of Engineering and Technology | Jun 2013 – May 2016

KEY ACHIEVEMENTS

- **Performance Award at TCS** — Recognized for consistent on-time delivery of high-priority full stack modules for international stakeholders.
- **25% Sprint Efficiency Gain** — Reduced fullstack sprint delivery timelines through Atomic Design principles, reusable component architecture, and backend optimization.
- **Enterprise Delivery** — Successfully delivered multiple enterprise-grade multiplatform full stack (React + Node.js) applications for global telecom and B2B clients across Malaysia and London.
